PRISMARK

ABOUT US

Prismark is a company based in Dar es Salaam, Tanzania, dedicated to helping businesses bring goods into the country smoothly, reliably, and without the uncertainty that so often defines cross border trade.

We manage the full weight of the import process, from customs clearance and documentation to coordinating cargo from the port to your door, absorbing the delays, paperwork, and back and forth that typically slow such businesses down, and behind that reliability stands a network of trade contacts and suppliers built across several countries, giving us the ability to locate, move, and clear the goods our clients need without the usual friction.

It is this connection to where goods originate, paired with disciplined execution on the ground, that allows us to work faster and deliver more consistent outcomes than the industry standard, turning what is often an unpredictable process into one our clients can plan their business around.

For businesses that import regularly, Prismark exists to remove the stress from that process entirely. From the moment a shipment leaves its point of origin to the moment it arrives at your door, our clients can stay focused on running and growing their operations, confident that their goods are in capable, experienced hands.

OUR VALUES

Efficiency:
We work to remove friction and delay from a process that is often slow by default.

Integrity:
Transparent handling of documentation, costs, and client goods at every step.

Reliability:
We do what we say we will do, on the timeline we commit to.

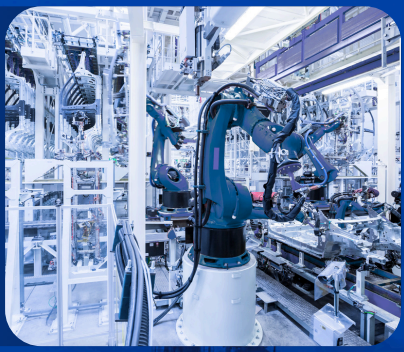

Partnership:
We see every client relationship as long term, not transactional.

WHAT WE SUPPLY

We support businesses across different industries by helping them source and coordinate the supply of the products, equipment, and materials they need.

MANUFACTURING

We help manufacturers source machinery, equipment, spare parts, and essential materials. Our team coordinates with suppliers to support smooth procurement. We help businesses keep their operations moving efficiently.

MINING

We support mining operations by sourcing equipment, spare parts, tools, and industrial supplies. Through our supplier network, we help clients locate the products they need. We also coordinate the supply process across different markets.

CONSTRUCTION

We help construction companies source materials, equipment, tools, and machinery. Our team supports the identification of suitable suppliers based on project requirements. We coordinate the process from sourcing to supply.

WHAT WE SUPPLY

INFRASTRUCTURE

We support infrastructure projects with the sourcing and coordination of essential materials and equipment. Our network helps us identify suitable suppliers across different countries. We help ensure products are coordinated according to project needs.

ENGINEERING & MAINTENANCE

We assist engineering and maintenance teams in sourcing technical equipment, tools, components, and spare parts.

OIL & GAS

We support oil and gas businesses with the sourcing of equipment, industrial supplies, spare parts, and specialized products. Our network helps clients identify suitable suppliers across different markets. We coordinate the supply process to meet operational requirements.

WHAT WE SUPPLY

AGRICULTURE

We support infrastructure projects with the sourcing and coordination of essential materials and equipment. Our network helps us identify suitable suppliers across different countries. We help ensure products are coordinated according to project needs.

AUTOMOTIVE

We assist automotive businesses in sourcing vehicles, spare parts, tools, and other related equipment. We help identify reliable suppliers for both common and hard-to-find items. Our team coordinates the process to support timely supply.

ENERGY & POWER

Our supplier network helps clients access products from different markets. We coordinate the supply process to meet project and operational needs.

WHAT WE SUPPLY

MARINE & LOGISTICS

We help marine and logistics businesses source equipment, spare parts, tools, and operational supplies. Our network allows us to identify suppliers across multiple countries. We support smooth coordination of goods from sourcing to delivery.
